Summary

Computer Science undergraduate (4th Semester) with hands-on experience in MERN stack, scalable backend systems, and ML-driven applications. Strong foundation in data structures and system design, with practical work in Large Language Models (LLMs), NLP, Computer Vision, and Generative AI to build intelligent, real-world software products.

Technical Skills

- **Languages:** C, C++, Python, JavaScript, Java
- **Frontend:** HTML, CSS, React.js, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, EJS
- **Databases:** SQL, MySQL, PostgreSQL
- **Machine Learning & AI:** NumPy, Pandas, Scikit-Learn, PyTorch, Matplotlib, Seaborn, OpenCV, FastAPI
- **Generative AI & LLMs:** Prompt Engineering, LangChain, OpenAI API, HuggingFace, RAG
- **CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems
- **Tools:** Git, GitHub, VS Code, MATLAB

Education

Bachelor of Technology in Computer Science
Rashtriya Raksha University, Gandhinagar

2024 – 2028
Currently in 5th Semester (3rd Year) CGPA: 8.8 / 10

Projects

Integrated Placement Management System — Full Stack Web Application

- Built a multi-role college placement portal with Admin, Coordinator, and Student dashboards supporting company management, application tracking, and automated deadline enforcement for 200+ student users.
- Implemented JWT-based authentication with role-based access control and a REST API backend ensuring secure, scalable data flow across all user roles.
- *Tech Stack:* React.js, Node.js, Express.js, PostgreSQL, Tailwind CSS, JWT, REST API

Sparkone — AI-Powered Cashier Theft Detection System

- Engineered a real-time theft detection system for restaurant cashier stations that uses FaceNet512 deep learning model to identify authorized cashier personnel and verify their shift schedule compliance.
- System compares detected face identity against a pre-registered staff database and cross-checks the current timestamp with the cashier's allocated shift window; triggers an automated error signal if an unauthorized individual or a timing mismatch is detected.
- Achieved robust face recognition accuracy using FaceNet512 embeddings with cosine similarity matching, served via a FastAPI REST endpoint for real-time inference.
- *Tech Stack:* Python, Computer Vision, FaceNet512, FastAPI, OpenCV

Achievements

- **2nd Runner-Up (3rd Rank)** — HackTheSpring'26 HackX Hackathon, GEC Gandhinagar 2026

Certifications & Events

Google Cloud: MLOps for Generative AI • MATLAB Onramp Certification, IEEE Gujarat Section • Python, Kaggle • Artificial Intelligence Workshop, Techfest IIT Bombay, organized by HCL GUVI • Codeversity AI Workshop & Hackathon, IIT Gandhinagar

Leadership

Secretary — IEEE Student Branch, Rashtriya Raksha University

Jan 2026 – Present

- Coordinated core team operations, managed internal communication, and oversaw scheduling for chapter meetings and technical events.
